

Malware Analysis Template

Basic File Information

Filename:	
SHA-256 Hash:	
File Location/Source:	
Date Acquired:	
Detection Context:	

Automated Triage

YARA Matches (local ruleset, Thor Lite, VT):	
FLOSS Decoded Strings:	
PEStudio/mal_unpack Results:	

Static File Analysis

File Size (bytes):	
Compile Time:	
File Type:	
File Path:	
Digital Signature:	
Icon Graphic:	
Packer/Compiler:	
Development Language:	
File Entropy:	
Imphash:	
Section Hashes:	
Version Information:	
Exported DLL Name:	
Embedded Resources:	

Overlay Contents:	
Noteworthy Imports:	
Noteworthy Exports:	
Significant Strings:	
Initial Theories: (Based on static analysis only, what do you think this file is intended to do, what evidence supports that theory, and what would you examine next?)	

Behavioral Analysis

File System Activity (created/modified/deleted):	
Registry Activity (created/modified/deleted):	
Network Behavior (domains, IPs, ports, protocols, listening ports):	
Process Behavior (spawned processes, injected code, command-line arguments):	
In-Memory Strings:	
Command Line Options:	
Execution Dependencies:	
Console Output:	

Code Analysis

Initial Code Observations: • What does the code appear to be doing at a high level? • How do strings, APIs, and logic work together? • Does this confirm or contradict earlier theories?	
Unpacking or Multi-Stage Execution Observations:	
Encryption Algorithms (FindCrypt, CryptoScan, manual):	
Encryption Purpose:	
Obfuscation Techniques (e.g., API hashing, control flow flattening, opaque predicates):	
C2 Logic:	
Anti-Analysis Techniques Observed (e.g., debugger checks, anti-VM):	
Code Reuse:	
Scripting Opportunities (e.g., unpacking, string deobfuscation):	

Analysis Summary

File Name:	
SHA-256 Hash:	
File Size (bytes):	
File Location:	
Detection Context:	
Compile Time:	
VT First Seen:	
File Type/Packed?:	
Digital Signature:	
Classification:	
Malware Family:	
Execution Flow:	
Key Functionality:	
Persistence Mechanism:	
File Artifacts:	
Registry Artifacts:	
Network Artifacts/Infrastructure:	
Observed Obfuscation (code or data):	
Detection Rules (YARA, VT Hunting):	
Custom Tooling/Scripts Produced:
